

KONICA MINOLTA

New, easy-to-use interface

based on EFI's powerful, intuitive command Work-Station™ technology.

Achieve maximum productivity

from your bizhub PRO printing system, with powerful digital prepress and workflow management capabilities to optimize throughput and maximize production efficiency.

Flexible, scalable design

meets your production needs today, integrates with your existing environment and provides a migration path to meet growing output demands and accommodate emerging technologies.

A choice of three workflow server options

to maximize both quality and productivity, so even the most basic production environment can quickly realize the benefits of MicroPress digital workflow efficiency.

Elevated print performance

drives each bizhub PRO device at full rated speed, provides sophisticated error recovery, allows simultaneous RIP processing so large files don't create production bottlenecks.

Expert make-ready tools

let you edit files, prepare RIPped documents for printing, allow job-level and page-level changes, insert tabs, merged RIPped files, collate, number pages and more.

New powerful tools

TrueEdit, TrueColor and TrueImage are easy to use, flexible tools for the management of layout modes, color and tone curves.

Advanced job control

with comprehensive job ticketing, tight engine control, MicroImager™ functions to streamline scanning and distributing hard-copy documents, auto archiving to any network location.

Professional color controls

for color-calibrating multiple devices, recognizing ICC profiles, spot color matching and editing, creating multiple proofing emulations from a single engine.

Superior image management

features let you print multiple thumbnail images on a single page, perform post-RIP color calibration, RIP to TIFF for easy comps preparation, simulate press and paper, manage hot folders and more.

EFI Digital StoreFront™ integration:

seamless interface with a powerful online solution for 24/7 customer access from any location – to submit print files, view PDFs, specify print options, receive quotes and track workflow.

Print Server & Controller Solution. One server takes your workflow anywhere you want to go. Drives up to 12 bizhub PRO printers. Provides expert prepress tools. Automates manual processes. Manages jobs. Controls color. And fully integrates with your existing production environment.

MicroPress® 7.0

The essentials of imaging

MicroPress® 7.0

MicroPress Specifications

MicroPress Prodigy:

Drives single engine
Single Intel® Pentium® 4
3.2GHz
160GB HDD
512MB RAM
Windows XP Professional

MicroPress Professional:

Drives up to 4 engines
Single Intel® Pentium® 4
3.2GHz
160GB HDD
1GB RAM
Windows XP Professional

MicroPress Production:

Drives up to 12 engines,
Dual Intel® Xeon™
3.2GHz
(3) 146GB HDD (1 used for RAID 5)
2GB RAM
Hot Swap
Windows 2003 Server

MicroPress® servers to drive your production.

Proven technologies, unmatched performance, and a range of choices to match the demands of your production workflow. With MicroPress, you'll have the right-size solution you've been searching for – and your bizhub PRO printing system will benefit from an integrated array of powerful make-ready tools, optimized job throughput and simple operation. You'll have cluster printing capability, maximized engine speed, sophisticated error recovery and more.

- MicroPress Prodigy™
- MicroPress Professional™
- MicroPress Production™
- TruePrint Power
- TrueRecover error recovery
- TrueCluster Printing
- PowerRIP Simultaneous RIP
- Newly Designed User Interface
- Scaleable Solution

Prep and print with expert prepress productivity.

With MicroPress TrueEdit™, you'll have a powerful array of production tools for digital prepress with streamlined efficiency and professional results. You can edit RIPPed files, control unique page settings, reformat documents, merge RIPPed files with variable data and more – all with simple, powerful commands that make production printing faster and more cost-efficient. And because your post-RIP files won't need re-processing, you can print immediately after your edits have been made.

- Merge RIPPed Files
- Page Level Media Selection
- Impose Functions
- Variable Data
- Tab Editor and Tab Builder
- Chapter Support

Manage print jobs with tight engine control.

With MicroPress, you'll have advanced job management functions and complete engine control capabilities to optimize your workflow. In busy production environments, tight engine control gives you the power to select finishing combinations more easily, maintain job tickets and archive documents more quickly, and leverage all the power of your bizhub PRO printing system.

- Color and B&W Split
- Job Ticketing
- Auto Archive
- TrueScript
- Open Printer Connection Virtual Engine
- Media Catalog
- Microlmager™
- Print Engine Control

Control color for more professional results.

MicroPress TrueColor™ allows for easy color management, with patented post-RIP calibration, color matching and color adjustment capabilities to improve your productivity and enhance the quality of your color print output. You'll be able to calibrate multiple devices, match and edit spot color, create universal curves and adjust color post-RIP for immediate correction and reprinting.

- Gammatic Calibration
- ConTune Multi-engine Matching
- ICC Profile Processor
- Spot Color Matching
- TrueBlue Spot Color Editing
- Soft Proof RIP to TIFF
- TrueCurves™ Universal Curve Creation
- Multiple Emulations per printer
- Press Simulations
